IMTS 2010 Booth# E-3956 PRESS RELEASE – Henning Industrial Software, Inc.

This year at IMTS 2010 Henning Industrial Software will feature the new **Visual EstiTrack - Executive Dashboard™** – an executive monitoring tool designed to instantly provide company executives summarized ERP data focusing on the “big picture” and relevant key business metrics and trends in an easy-to-use, organized and pleasing graphical user interface.

The Executive Dashboard can be configured to provide pre-summarized trending data based on the user’s needs and timed to provide the information based on a specific schedule (for example, by day, week, month or year). Henning’s new offering will allow Executives, owners

and shop management to quickly grasp the state of their business at any given time in a format that is comfortable for them to quickly absorb.

**Talk to Me Technology** - A unique feature of the Executive Dashboard is its ability to provide “verbal” briefings and to present data using gauges and graphs. The executive can ask the executive dashboard to provide a verbal daily briefing on the key business metrics being monitored and can simply listen to them while multitasking through their other duties.

**Henning Industrial Software develops Visual EstiTrack™ ERP Manufacturing Software and Visual Books fully Integrated Accounting, proven national leaders in job shop and manufacturing software solutions for small to medium sized fabricating, machining, assembly, tool and die, single or mixed mode manufacturing and service providing businesses. Visual EstiTrack is a complete, very powerful, affordable, easy-to-use, flexible and scalable.
